SURFACE STORY

Smooth, ultra thin and durable, our concrete microtopping can be used to cover any surface from walls to floors, worktops to splashbacks. These cement-based coverings can seamlessly join ceilings, feature walls and flooring in almost any colour. From 3-9 mm. Hard-wearing, waterproof, but above all, stylish.

Our cladding comes in various shapes and colours however we can also work on request. Some of our recent projects are shown below. Our carpenters can also install the cladding and it looks really good with shelving made from the same wood, and lighting...

FALEGNAMERIA CAMPO

www.falegnameriacampo.it campo@campofal.it T. +39 043859949

The Falegnameria Campo was founded in the early 60ies with the ambition to satisfy a market focused on custom made furniture, choosing to create a unique, exclusive and high level product.

We want to transmit deep emotions developing the warmth and intimacy feeling that only artisanal woodworking can spread : luxury houses, resorts and hotels, apartments, shops boiseries, libraries and all that could be unique.

Falegnameria Campo means also the ability to be craftsman with our old hand tool and finishings together with the modern woodworking machines and CAD/CAM design.

One of the "pearls" of our production is "La Cantina di Paul" the perfect "Wine Suite", born from the best international wine expert experiences, allowing the customer to put the winecellar wherever he loves it.
